**The age ranges are more of a guide—some students may be moved up to another class if younger but more advanced, and some older students may be asked to stay in a younger class if they are not advancing in skill enough for success in the next class. Student's attitude and attention (or lack thereof) in class could also become part of the deciding factor.

Both scenarios are at teacher/studio owner discretion. If you have questions about this, we can discuss. .
